ENGINE S.R.L., Barbaresco (Piedmont)

Engine Pure organic Gin

Winemaker	ENGINE S.R.L.
Region	Piedmont
Alcohol	42% vol.

Winemaking

Engine is an organic Italian gin that is produced according to the maceration process. Alongside juniper berries, the main ingredients are lemon peel, sage leaves and rose petals, as well as liquorice roots (botanicals). Thanks to a latest-generation rotary evaporator, distillation under vacuum is possible at very low temperatures.

Our tasting note

Engine Gin has a clear, transparent colour. Intensely fragrant aromas of lime and orange blossoms on the nose, together with a subtle sage note. Citrus notes in turn dominate on the palate, with a hint of ripe fruits and green tea.

ENGINE S.R.L.

Engine is a 100% Italian organic gin from the Alta Langa region on the border between Piedmont and Liguria. This gin was originally developed by Paolo Dalla Mora, an entrepreneur and consultant in the fashion and spirits sector and founder of Osteria Campamac in Barbaresco. The original and unusual packaging is inspired by the world of engines, a great passion of the founder. Engine Gin is now being continued by new owners after the company was sold at the end of 2023.
